EXAMINER'S AMENDMENT

1. Authorization for this examiner's amendment was given in a telephone interview with David I. Roche on May 24, 2006.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Specification, page-1, under "RELATED APPLICATION", line-3, after "10/131,842, the phrase - - ,now U.S. Patent No. 6,696,125- - has been added.

Claim 12, line 1, the dependency is changed from "12" to - -11- -.

Terminal Disclaimer

1. The terminal disclaimer filed on March 20, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6696125 has been reviewed and is accepted. The terminal disclaimer has been recorded.

2. The terminal disclaimer filed on May 18, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Application Serial no. 10/776868 has been reviewed and is accepted. The terminal disclaimer has been recorded.

3. The following is an examiner's statement of reasons for allowance:

Art Unit: 1772

A review of applicant's arguments in amendment filed on December 21, 2005 and a review of the instant claimed invention has convinced the examiner that the claims are allowable over the applied prior art of record. The prior art fails to teach a self-adhering underlayment for tile roofing comprising a dual-compound composite sheet having a carrier sheet sandwiched between a top layer and a bottom layer. The top layer comprises a mixture of polypropylene modifiers comprised of isotactic polypropylene, ethylene-propylene copolymer, atactic polypropylene and polyethylene; filler and asphalt. The bottom layer comprises a self-adhesive compound mixture of styrene-butadiene-styrene copolymer, styrene-isoprene-styrene copolymer, hydrocarbon tackifying resins and asphalt.

Also no evidentiary support could be provide to support the position that the claimed invention would have been obvious over the prior art of record discussed above.

The closest prior art of FENSEL (USP 6641896) teaches a self-adhering underlayment that is impregnated with bitumen-based composition but fails to teach all the materials for the top and the bottom layers forming the dual-compound underlayment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

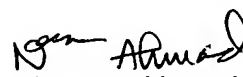

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 571-272-
